### DETAILED ACTION

1. Receipt is acknowledged of Applicant's Preliminary Amendment, filed November 30, 2001.
2. Claims 1-16 are presented for examination.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a chemical-mechanical polishing process, classified in class 451, subclass 37.
  - II. Claims 7-16, drawn to a method of fabricating an integrated circuit, classified in class 438, subclass 1.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to the manufacture of different products. Moreover, the invention of Group I may be used in the manufacture of layers for other layered products, such as magnetic read/write heads, or in the manufacture of ink jet heads.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
